Requested Resolution from Maraprojects:

Dear Elance,

This is my third time to file a dispute; I really have no idea about how to add details so I've created a new one. I'm new here and dealign with experienced professional freelancer!

I don't want a refund; I just want to update the feedback to protect other users from this unprofessional freelancer.

I assigned this freelancer two projects. Both projects were about collecting twitter data.

First Project: was a sample data; we've received the data; unfortunately, I trusted this freelancer and provided a positive feedback.

Second Project: This freelancer thinks that he's too smart and others are less smart! He didn't complete the project; wasted my time then he asked me to pay him in full and also provide a positive feedback:

The Task:

My Requirements - collect twitter data for:

1. Facebook: March 2014
2. Heartbleed: from Nov 2013 till June 2014

&

Freelancer Proposal/agreement:

> Total budget will be 250 for code+data

Then the freelancer sent the below email asking me to pay in full for incomplete job (didn't collect all the data and didn't send us the software!!!!

Freelancer reply:

""

I think the data for heartbleed is also too much. ... I request you to kindly end the present contract of 250\$ with a 5* and start a new contract for heartbleed.

""

Delivered:

Inconsistent data and all based on copy/paste - I've received many errors when I processed the data. The freelancer immediately cancelled the second project to avoid negative feedback.

I just reassigned the project to another freelancer - Please check my account and my communication with the other freelancer!

It's also important to note that this freelancer lacks communication skills and uses unprofessional words.

I just want to change my feedback & next time I'll make sure that I won't leave a feedback unless I'm certain about the delivery - I've learned my lessons - I need to be careful when dealing with freelancers!

Regards,
